

April 2016 – How to change icon of vehicle

This month's tip is dedicated to all, who want to organize their fleet management using different icons for devices/vehicles on the map for easier and faster orientation. Feature is designed for companies – transporters who have different brands of vehicles. For changing the icon we first choose **device/vehicle** and move it on the right bottom side of window on tab **Device>Map>Icon**. At the end you just find icon that you like and set as shown on picture.
