

TIP OF THE MONTH - November 2014

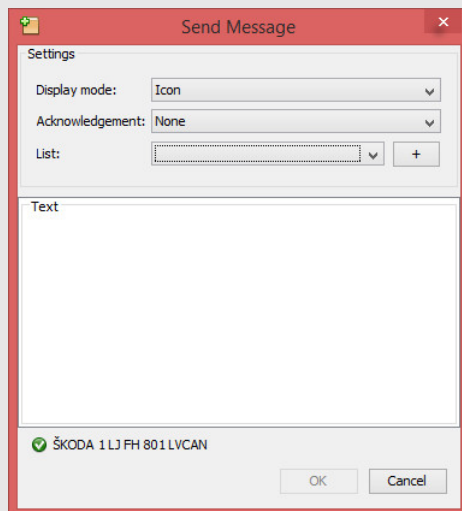

Sending predefined messages

In this tip of the month we will present a novelty sending predefined messages. Tip is designed primarily for transport companies and all other businesses in which you are using a tracking device with navigation.

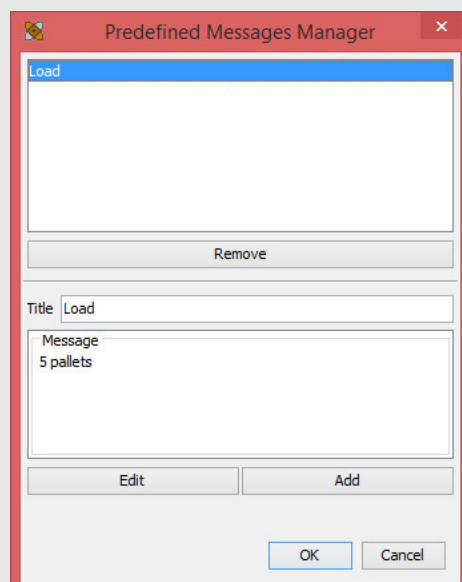

1. On the toolbar, click the icon to send a message.

2. In window we click on +.

3. Then we enter the name and description of the message, which we want to be saved as a predefined message for multiple use.

4. After the confirmation message will appear in the list.
